Summary

Angular Developer and Junior Full-Stack Developer with 1.5+ years of professional experience designing, building, and maintaining business-critical web applications. and delivering enterprise-grade web applications. Specialized in Angular 18, TypeScript, and REST API integration, with experience delivering 14+ production dashboards, integrating 20+ API endpoints and improving overall application performance by 25%. Experienced in building ERP systems, CRM platforms, supplier portals, healthcare dashboards, and multi-vendor e-commerce solutions. Proficient in JWT Authentication, Refresh Tokens, RBAC, Firebase, and robust full-stack architectures using Laravel and MySQL.

Work Experience

Front-End Developer — TheOne System

Feb 2025 – Present

- Optimized Angular application performance, cutting page load times by **25%** and significantly improving user retention across 5+ production environments.
- Architected, shipped, and maintained **14+ dashboards** spanning ERP, CRM, healthcare, legal, supplier, and e-commerce domains, serving hundreds of daily active users.
- Integrated **20+ REST API endpoints** with full error handling, caching strategies, and role-based access control (RBAC) for enterprise clients.
- Managed a shared Angular component library and module system reused across 14+ dashboards, reducing duplicated development effort.
- Configured Firebase Cloud Messaging workflows enabling real-time notifications with sub-second delivery for business-critical operations across 3+ platforms.

Projects

CRM & Business Workflow Management Platform

Angular 18 · TypeScript · Firebase · REST APIs

- Architected a multi-department CRM platform unifying 4 departments: Marketing, Sales, Support, and Development.
- Enforced JWT Authentication with Refresh Tokens and granular RBAC, securing access for **5+ distinct user roles** across the organization.
- Configured Firebase Cloud Messaging, delivering real-time notifications for 5+ departments upon workflow state changes.
- Systematized the full customer journey pipeline across 4 business stages from lead acquisition to post-sales support.
- Shipped multilingual support (AR/EN), dark/light themes, WhatsApp integration, and advanced analytics dashboards within a single release cycle.

Al-Eman Installment & ERP System

Angular 18 · TypeScript · REST APIs

- Built a full-featured ERP and installment management platform covering **10+ business modules** including customers, suppliers, contracts, inventory, warehouses, and treasury management.
- Automated PDF generation, advanced search, filtering, and pagination workflows, reducing manual reporting effort and improving reporting efficiency.
- Applied Angular Signals and reactive state management patterns to improve UI responsiveness and reduce unnecessary re-renders.

Baya3 Supplier Dashboard

Angular · REST APIs

- Constructed a supplier portal managing 1000+ products, orders, and operational workflows for a growing vendor network.
- Streamlined end-to-end order lifecycle management from order acceptance through final delivery.
- Delivered 10+ filtering and data visualization features, improving operational visibility for suppliers.

Law Firm Management System

Laravel · Livewire · MySQL

- Engineered a full-stack legal management platform handling **500+ active cases**, document management, and internal workflows for a law firm.
- Planned a MySQL relational database schema supporting complex case-document-client relationships with full audit trail capabilities.

Medical Consultation Dashboard

Angular · Firebase · REST APIs

- Built a healthcare dashboard managing doctors, patients, and appointment scheduling with real-time availability updates.
- Leveraged Firebase Realtime Database to cut appointment booking response time to under **1 second** for end users.

Multi-Vendor E-Commerce Dashboard

Angular · REST APIs

- Constructed and maintained a multi-vendor dashboard processing **1,000+ monthly orders** across multiple vendor accounts with zero downtime.
- Created intuitive data-driven interfaces that simplified onboarding for 50+ vendor accounts.

Book Price Comparison Website

WordPress · PHP · REST APIs

- Launched a price aggregation platform handling **1,000+ monthly searches**, pulling real-time data from multiple external APIs and book retailers.
- Decreased average user search-to-decision time by consolidating pricing from **5+ sources** into a single unified view.

Technical Skills

Frontend: Angular 18, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, RxJS, Angular Signals, Responsive Design

Backend & Full-Stack: PHP, Laravel, Livewire, WordPress, REST API Development

Database: MySQL, Firebase Realtime Database, Firestore

DevTools & Platforms: Git, GitHub, Firebase (FCM, Auth, Realtime DB), Postman

Security & Architecture: JWT Authentication, Refresh Tokens, RBAC, API Integration, State Management, Component-Driven Architecture

Soft Skills: Analytical Thinking, Cross-Functional Collaboration, Task Prioritization, Continuous Learning, Attention to Detail

Education

Al-Shorouk Academy

Aug 2019 – May 2023

Bachelor of Science, Computer Science — Faculty of Computers and Information

Graduation Grade: Good (GPA: 70%)

Languages

Arabic (Native) | English (Professional Working Proficiency)
